ADOT

Loop 101 Closure and Restriction Notice

10 p.m. Friday, (Feb. 6) to 1 p.m. Saturday, (Feb. 7)

With the completion of the High Occupancy Vehicle (HOV) lane project coming this spring, Arizona Department of Transportation (ADOT) has necessary follow-up items to complete. The closure this weekend will allow work crews to install electrical traffic monitoring systems.

Feb. 6 – 7

Northbound Loop 101 (Pima Freeway) from Loop 202 (Red Mountain Freeway) to McKellips Road will be closed from 10 p.m. Friday to 1 p.m. Saturday.

ADOT scheduled the closure to keep the HOV project on schedule. Although detours will be set up, drivers are encouraged to plan alternate routes to avoid using Loop 101 during the closure over the weekend.

Project Summary

As part of the Regional Transportation Plan (RTP), ADOT will construct one new HOV lane in each direction and install Freeway Management System (FMS) technology to the 15-mile segment of the Loop 101 (Pima Freeway) from Princess Drive to Loop 202 (Red Mountain Freeway). The HOV lanes and FMS improvements will be constructed primarily within the existing open median, along with new lighting to replace existing lights. The median barrier will be replaced by a concrete barrier for the full length of the project. An auxiliary lane will also be added northbound, allowing traffic to merge between the Cactus Road on-ramp and the Raintree Drive off-ramp.

FMS improvements will include variable message signage and traffic monitoring systems to provide data to drivers and ramp metering will be added to manage the flow of traffic entering the freeway.

Project Schedule

Spring 2009 Anticipated Project Completion

ADOT is working to finish this project as quickly as possible with minimal disruptions to traffic during this time.
